

Ceramic & Glass

Ceramics and glassware play a unique role in contributing to a healthy life and a clean environment, especially when they are used as food containers. With mounting concern regarding safety issues, and implementation of even stricter regulations, it is imperative and crucial for manufacturers and buyers to ensure their products are tested to market-specific and regulatory standards. To meet these increasing demands, HQTS-QAI provides you with a full package of ceramics and glassware testing solutions to mitigate your risk and improve the bottom line in your market.

Chemical Testing

- FDA, Food grade test
- Lead content on surface coating
- EU Food grade test
- Total Cadmium

Physical Testing

- Wipe Test
- Annealing
- Thermal shock (just glassware)
- Dishwasher test
- Water absorption test
